Stage: 5

DAZ.

9.15pm

END

DAZ.

Target:

27408 – 0009

Viewer: Daz
Method: CRV
Monday, 28 April 2008

The target feels:

Like a warm location which is made of land which has many man made structures. These are interacted with by a speedy energy/motion.

Land

Solid, dry, warm.

Structures:

Lots of structures, many are very tall and linear.

These are man made and feel modern and some are utilitarian.

Some of the structures have data which feels like a collapse or disintegration of the floors.

- (1) Page 6 sketches. Tall, very linear, boxy structures.
- (2) Page 7 sketches – curved, solid, constructed, structure. This feels close to a liquid – water. This too feels affected by the speedy energetic.
- (3) Pages 8 sketch – tall linear, lipped, constructed, angular, cold, hard, structure. Lots of people are at the base of this structure.

Overall I get the feeling of a large city with many structures. These feel impacted by a fast moving energetic that causes damage, destruction to the structures.

Life:

Many all around the target location. Some are outside the structures and feel bunched, some are inside the structures and some feel trapped.

Energetic:

A building, fast moving energetic. Erratic, intense and impacting to the location.

This is surprised and causes chaos and damage.

The cause feels natural – part of a natural cycle.

AOL's of:

Twister, Towers, Disaster, Structures, Twin towers, Thunder storms.
