Bustling Old Village / Town Scene w/  
Waterways

## Sl6 Diarization

There is a village/town that has medieval type architecture and structures in it using a lot of stone and plaster. There are winding narrow streets with buildings built close to each other and some waterways that about the buildings like Venetian Canals.

There is a square with a clock. A lot of birds. A lot of human activity.

There is a glass-blowing facility in the area. The area looks run-down but has a good energy - it is loved by many.
