Target:
2106-0027

Viewer: Daz
Method: CRV
Saturday, 21 June 2008

The target feels like:

A contained community of people.

They feel like they are existing a basic life under cover in modular/domed structures in a very harsh environment. The target feels very remote and distant – it also feels like the future or futuristic.

This target feels cold and bleak the environment feels very sparse and the sky dark or grey. Reminds me of a scientific team in the arctic with a very long winter and no sun.

AOL's of:

Modular, barrels, water, habitat, Eden project.
