Dir.

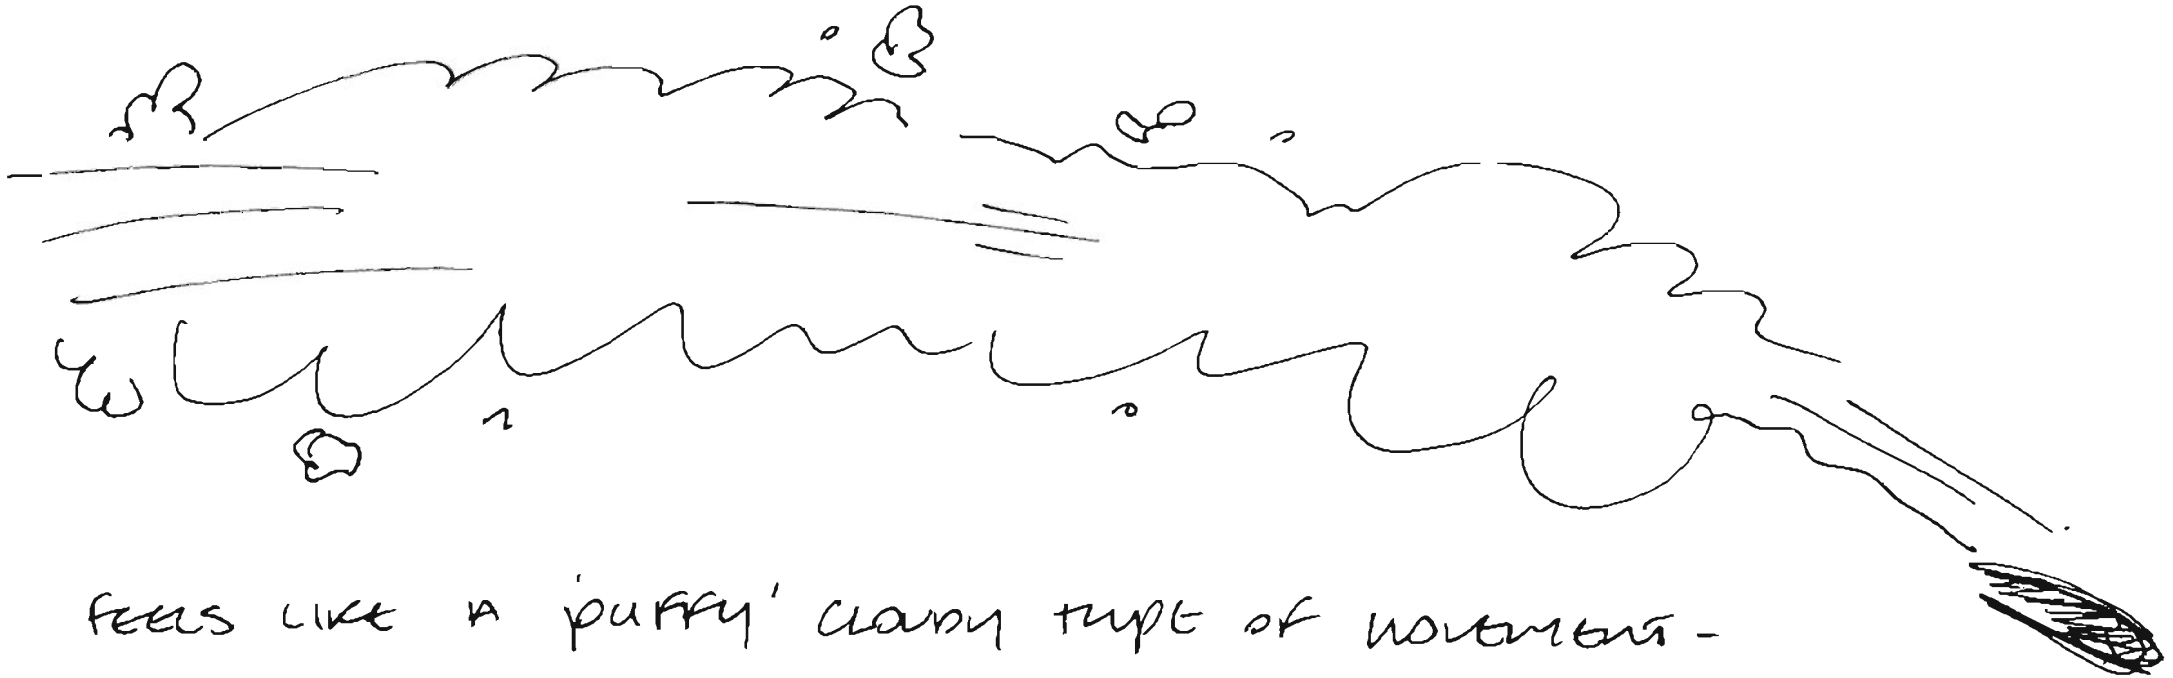

2805-0001

SB<sup>1</sup>/<sub>2</sub>: FEELS LIKE MOVEMENT ABOVE - WET/LAND.  
Probably in the sky?

MOVE ABOVE THE THRUST TO AN OPTIMUM LOCATION/  
SKETCH/DESCRIBE IN FULL DETAIL:

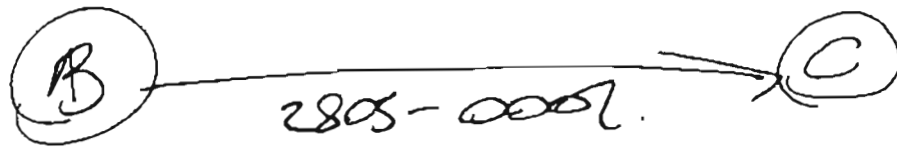

FEELS LIKE A 'PUFFY' CLOUDY TYPE OF MOVEMENT -  
'SMOKE' OR 'TRAIL' - LIKE IN NATURE.

page: 8.

Stage: 3

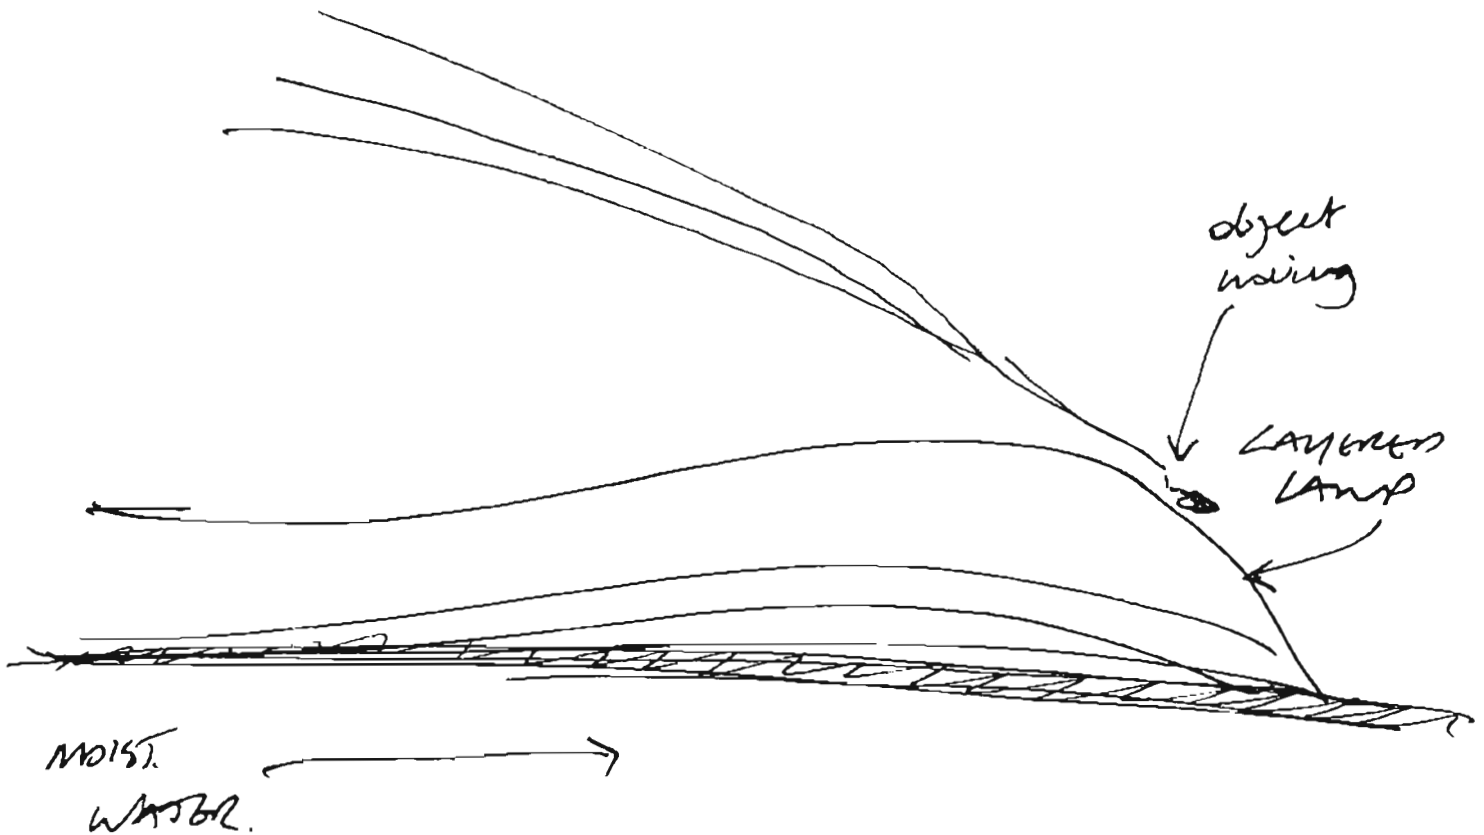

DAR.

MOVE IN FROMS OF THE TARGET TO AN OPTIMUM LOCATION  
TO SKETCH / DESCRIBE IN DETAIL:

AN  
ANSW.

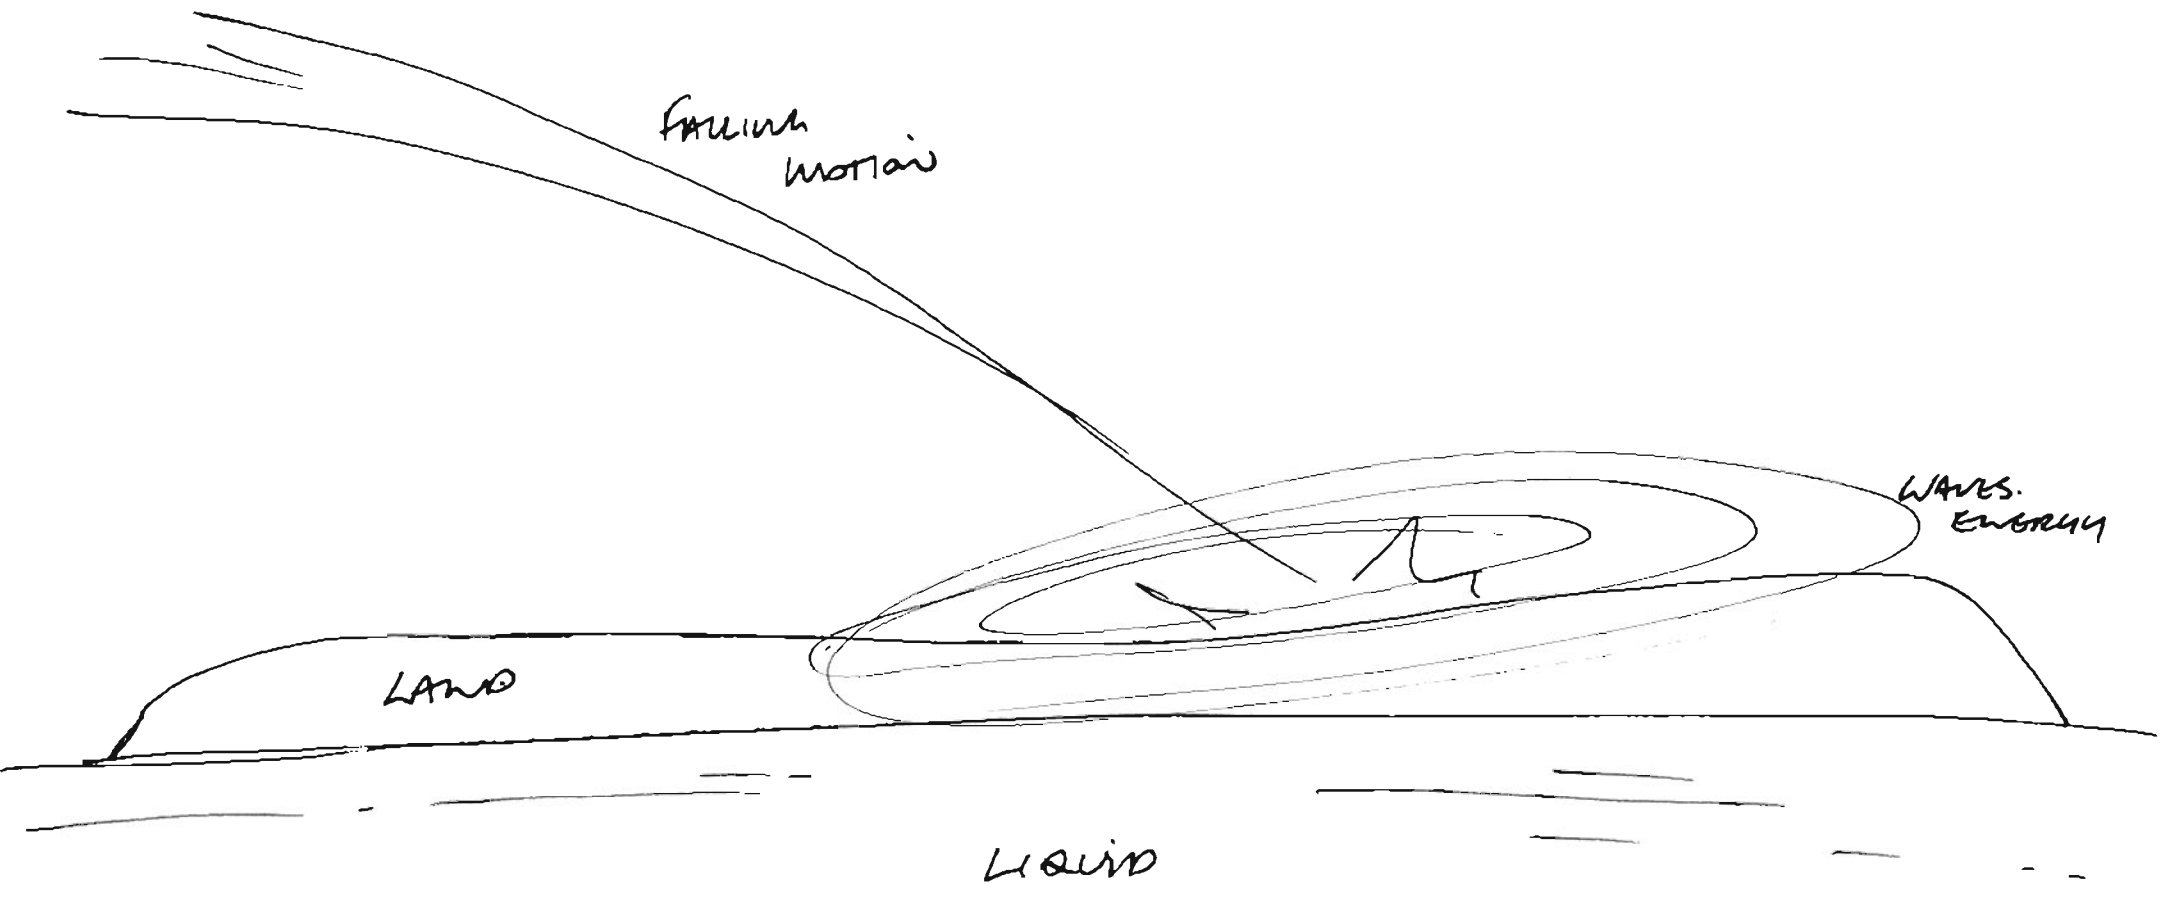

SB<sup>1</sup>/<sub>2</sub>: FEELS LIKE AN EVENT WHEREBY A MOVING OBJECT - MOVING DOWNWARDS. INTERACTED WITH LAND/LIQUID.

A FEEL OF A NATURAL EVENT.

APL  
ARANTIS  
APL  
CATALYSURE.

3.10pm  
END 😊 DAZ.

## Target 2805-0001

Remote Viewer:	Daz Smith
Method:	CRV
Protocol:	<b>BLIND</b> – I had no information on this target other than the number
Date:	30 May 2010

### The primary components of the target is:

Land  
motion  
object

### The land is:

Thick, deep, moist, brown and mushy, spongy.  
wet, moist, coll, smelly, thick, green and blue.  
There feels like an organic, musty smell.

Part of the land feels raised.  
Raised above a wetter/denser land.  
The land has vegetation.

A part of the land feels layered – has exposed layers.  
below this are plains or a flat area.

### The Motion is:

Swift and fast moving.  
Energetic – energy involved.

### This is:

Warm, moving  
dropping  
downwards thru spacious blu skies.

Feels like a 'puffy' cloud-type of movement – smoke or 'trail' like in nature

**In front of the target it:**

Feels like a far away view of an object dropping and moving. There is a great expanse of flatness leading towards a raised expanse of land in the distance.

Feels like a fast moving and dropping in trajectory object that then interacts with land. There is also a release of energy involved.
