Summary

The target/event involves space, energy, natural, land water.

This was a very emotionally physically impacted session. Because of this I question the accuracy of the session, but will proceed to the end regardless. My summary format is off.

The land has a lot of activity on it. Lots of biologicals in motion. There will be an event of huge proportion. It will be sudden, unexpected, and avoidable. The source of event will come from the sky.

end of session

11:09 pm
