

(LIKE ASIAN
FACTORY workers)

Little worker
guys
have tasks
very attentive
BUSINESS LIKE

stop

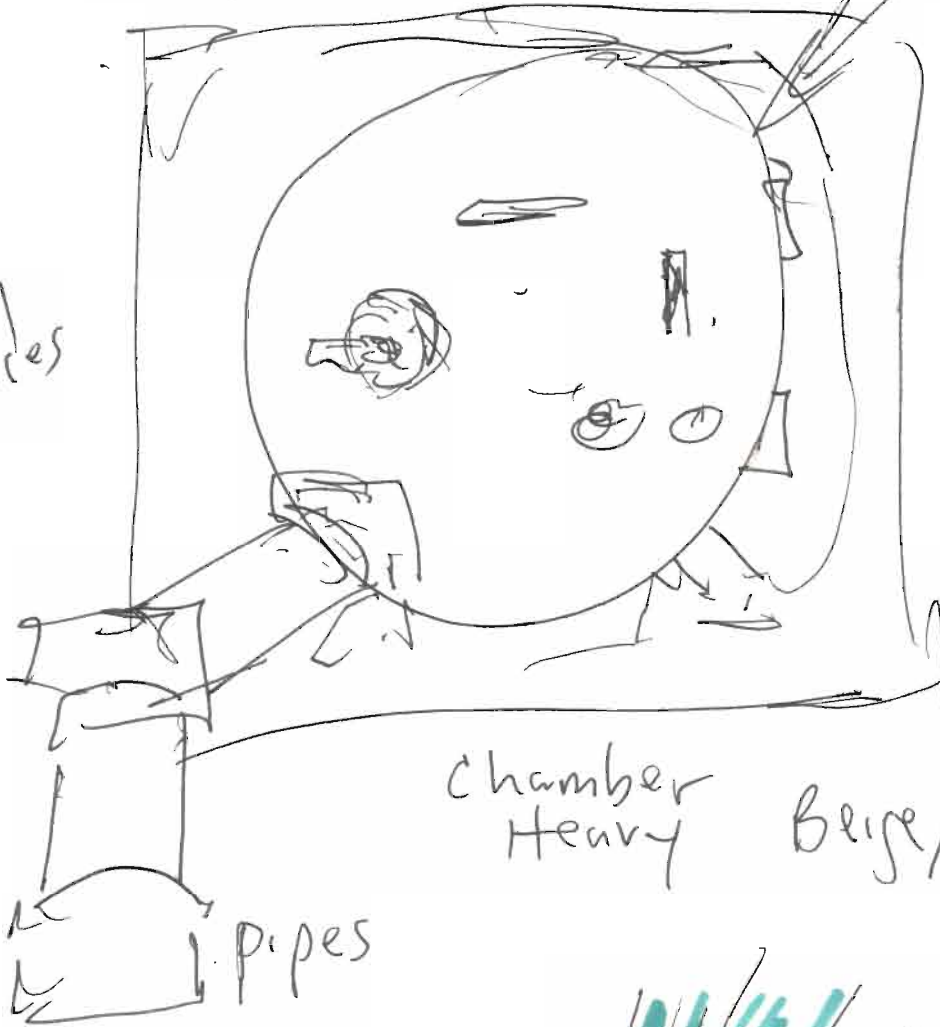

Long chamber
or tunnel

Feel of INDUSTRIAL place
LIKE power plant

This is
like an
opening /
face
cover
door

locking
devices

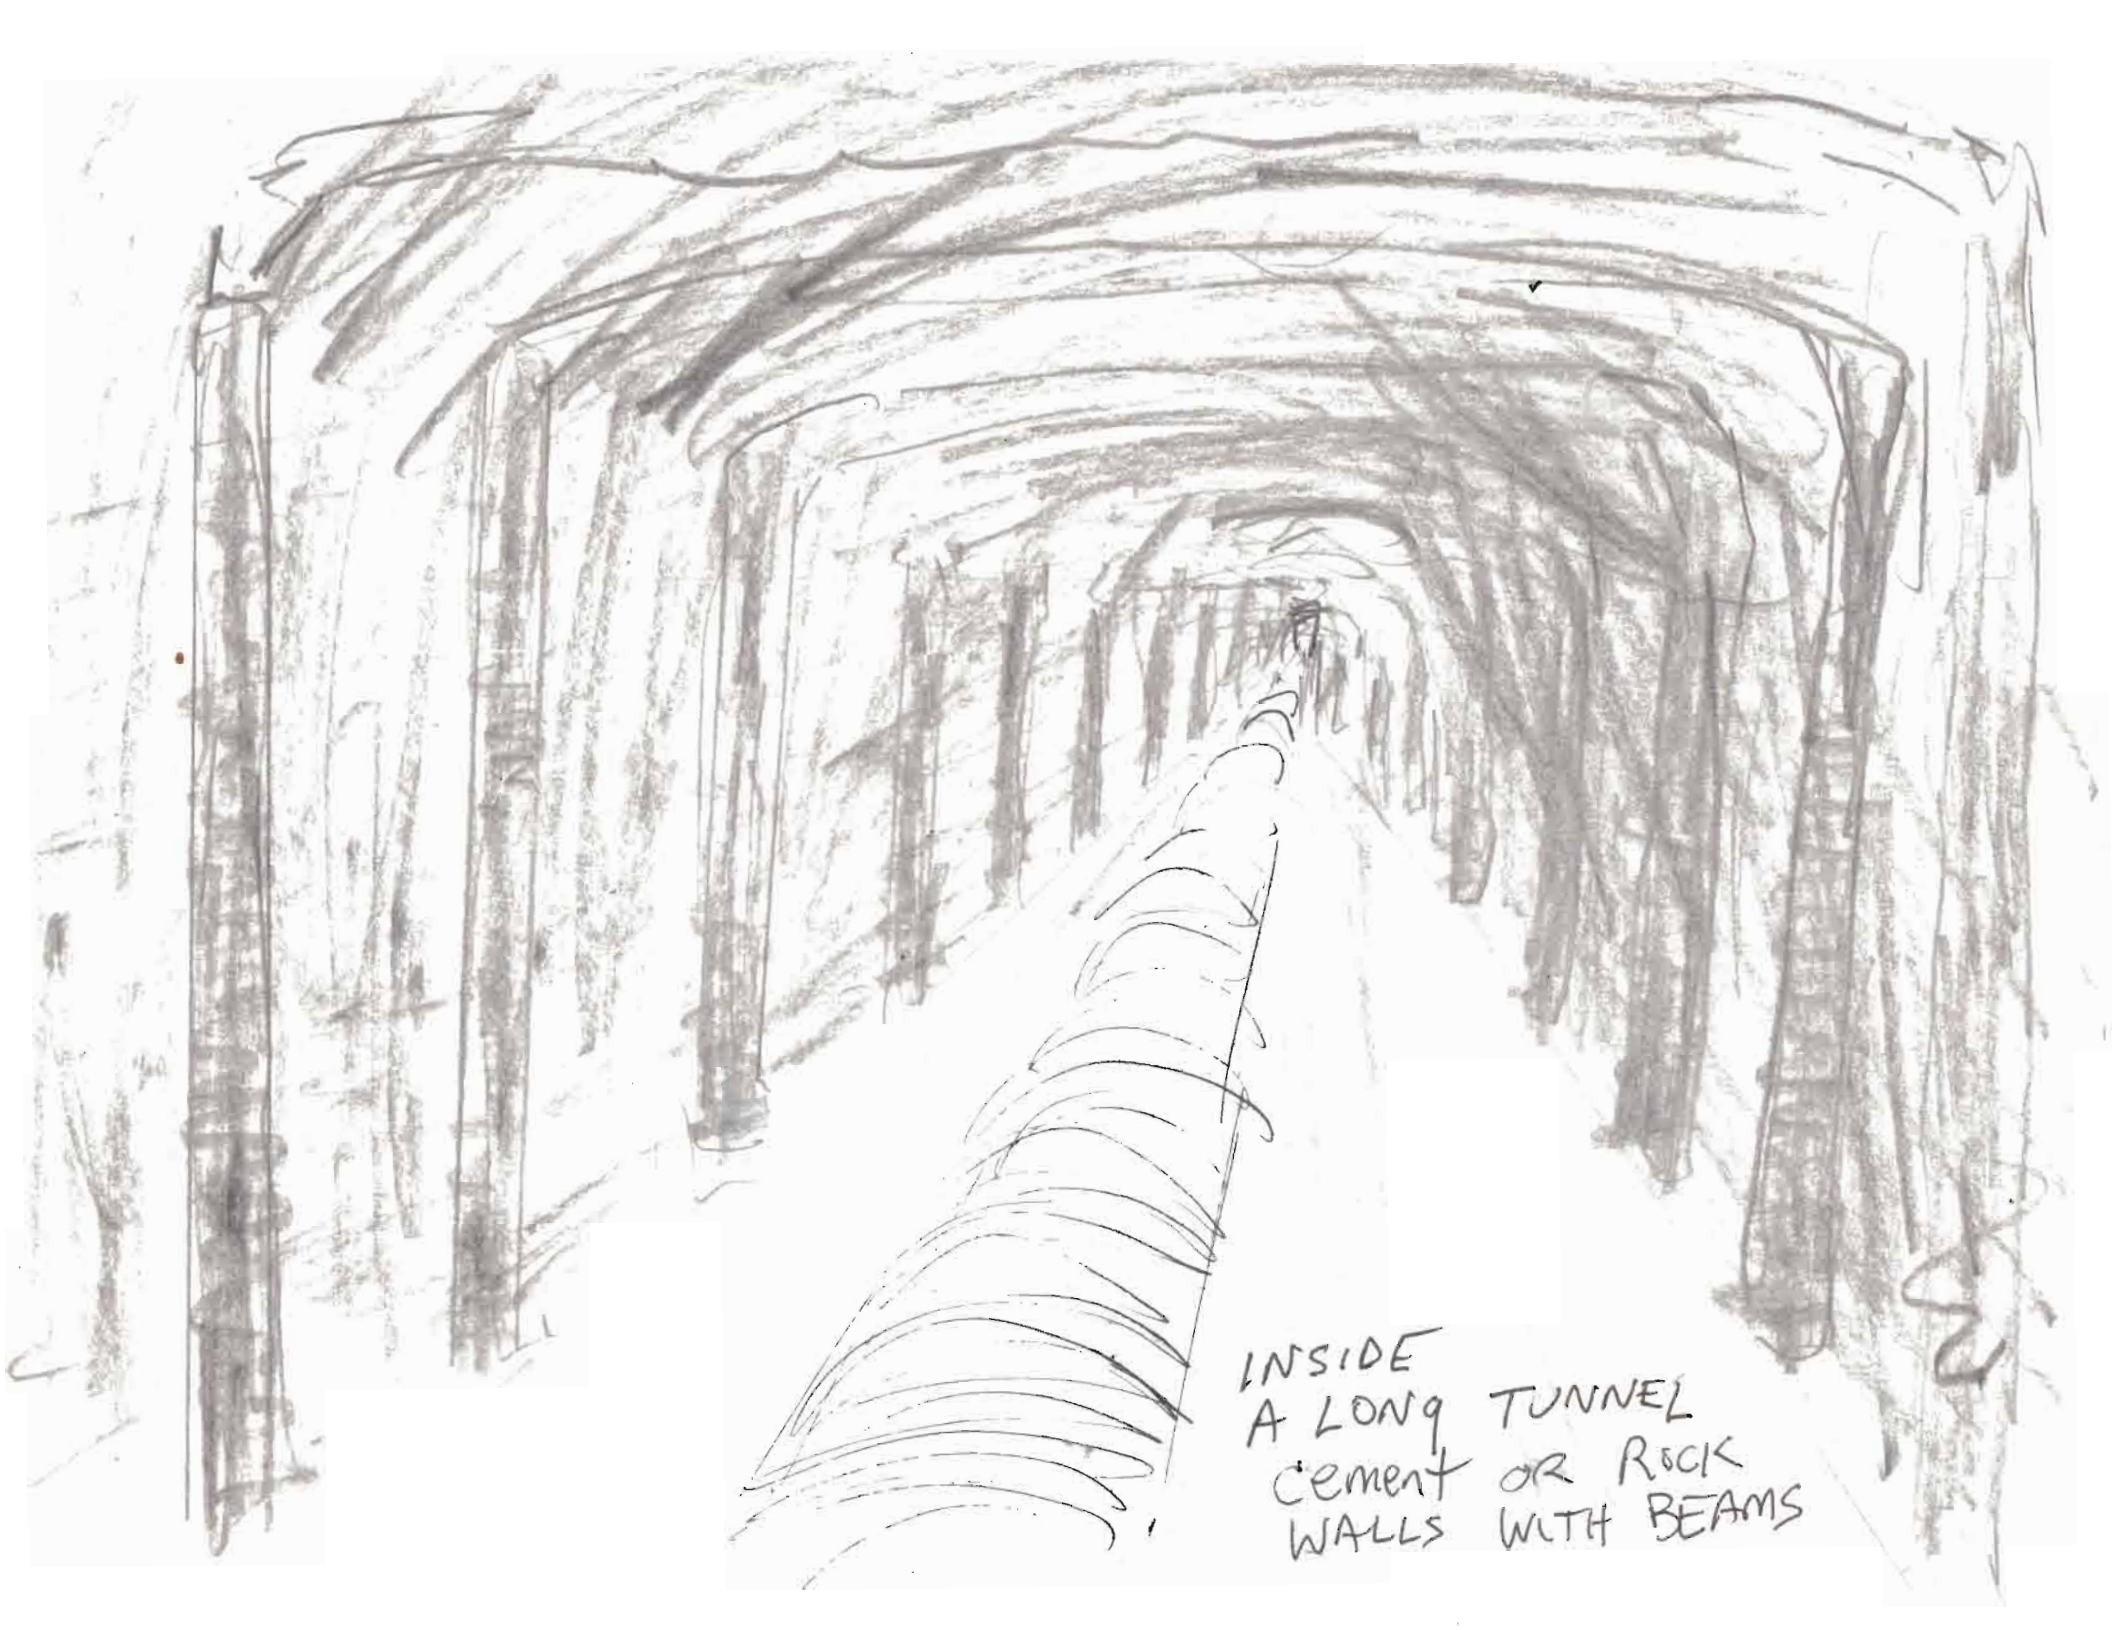

Chamber
Heavy Beige/white

pipes

FIRES pulses
BLUE LIGHT
BEAMS

Looked sort of
like USB plug
But much bigger
18 inches across

INSIDE
A LONG TUNNEL
CEMENT OR ROCK
WALLS WITH BEAMS

7B2

Complex
HARD
ARTIFICIAL
DYNAMIC

MACHINERY SOUNDS
smell Heat molten metal
HOT SEARING
MOLTEN

LIKE people working at
a SLAG heap

BEINGS WORKING
MACHINERY NOISE
EARTHY ACRID SMELLS
ROCK

Texture LIKE slag
rough metal-melted
then hardened
IN rough irregular

72 B

WALKING DOWN
INTO A GLOWING
PIT

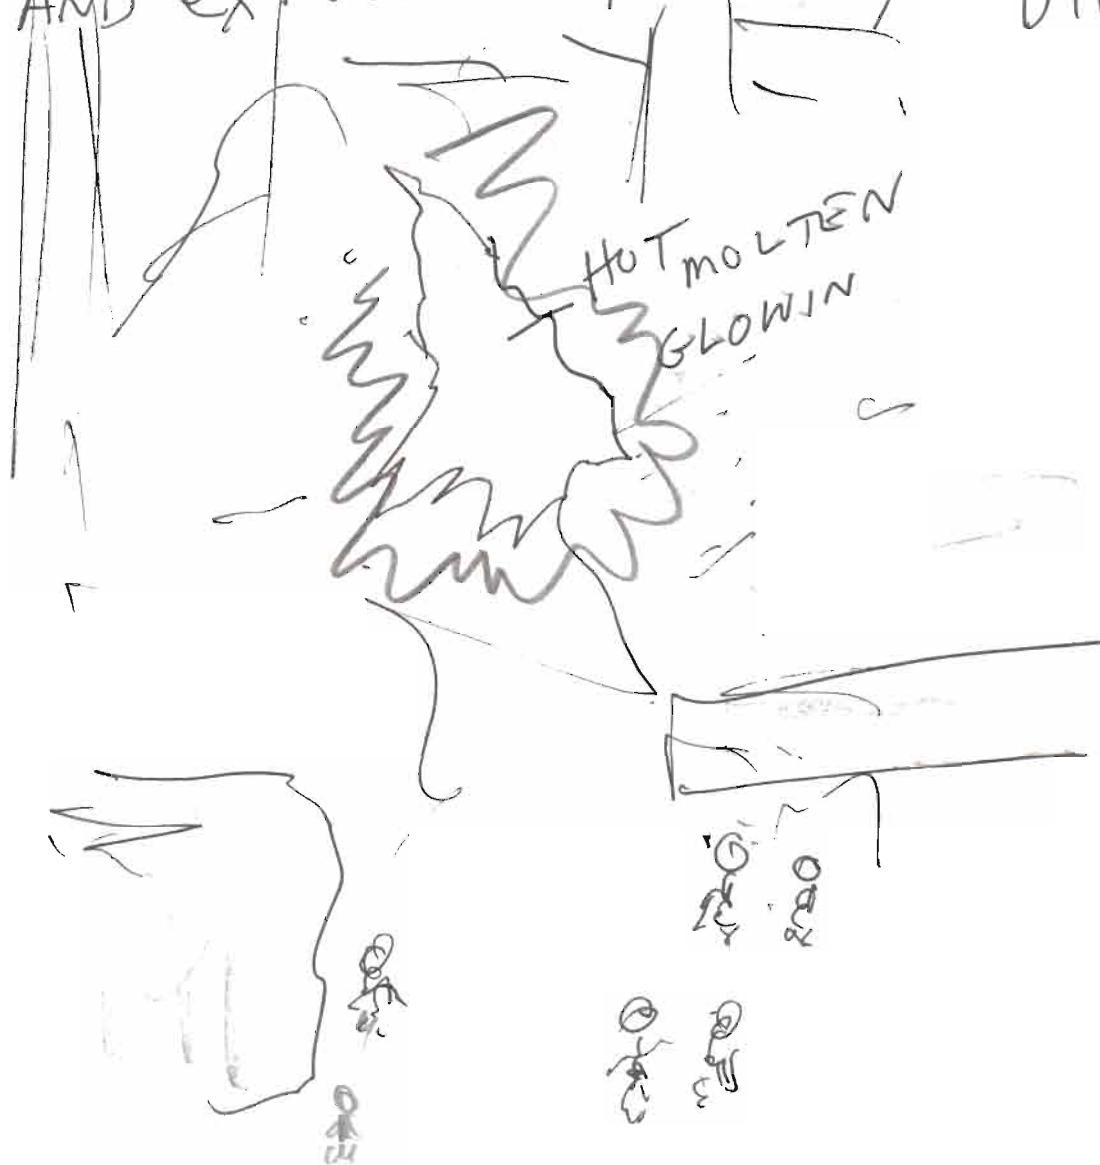

THIS seems A
Dangerous place
environmentally in
a way that would
Be very
unhealthy -
These workers
Do not survive long
They are LIKE
DRONES OR

LIVING ORGANIC
ROBOTS
Somehow adapted to
working here.

They ARRIVE FOR "WORK"
A BUNCH of small workers
all SAME SIZE -
They enter A place with
A SLIDING DOOR opening -
(LIKE Large elevator) AND ARE
TRANSPORTED Somewhere
THEY HAVE NO emotion ABOUT this
ITS LIKE genetically designed
ONLY for this.

LIKE WORKING IN A MINE where you
USE ENERGY TO ~~LIQUIFY~~ THE ROCK
AND extract it that way DIM

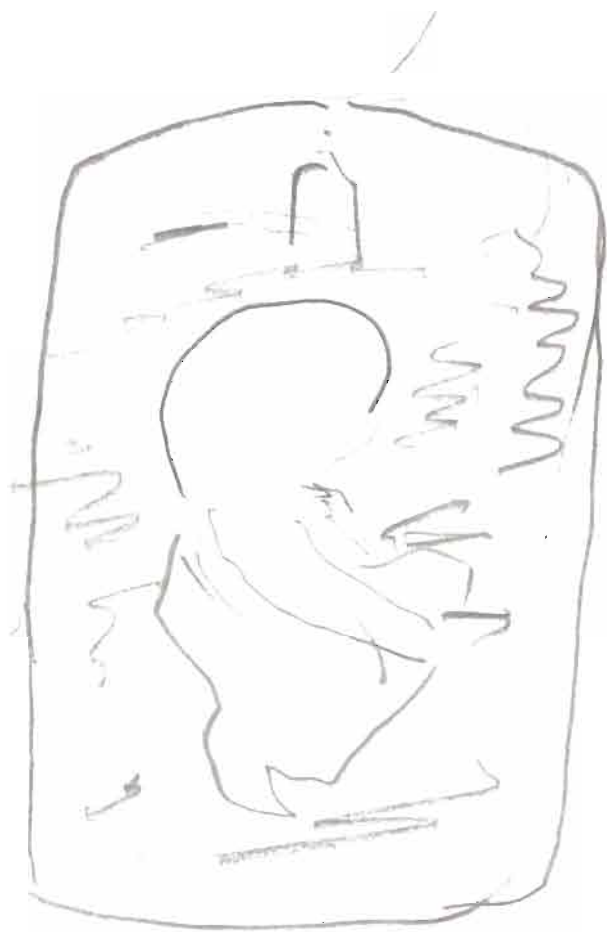

THIS Feels LIKE A FOUNDRY
A Big place with glowing molten slag
Normal HUMANS could not STAND this.
These BEINGS somehow withstand the
heat & BAD TOXIC AIR QUALITY.

A sense of a Big Project.
Like a documentary I saw about
BUILDING Hoover DAM.

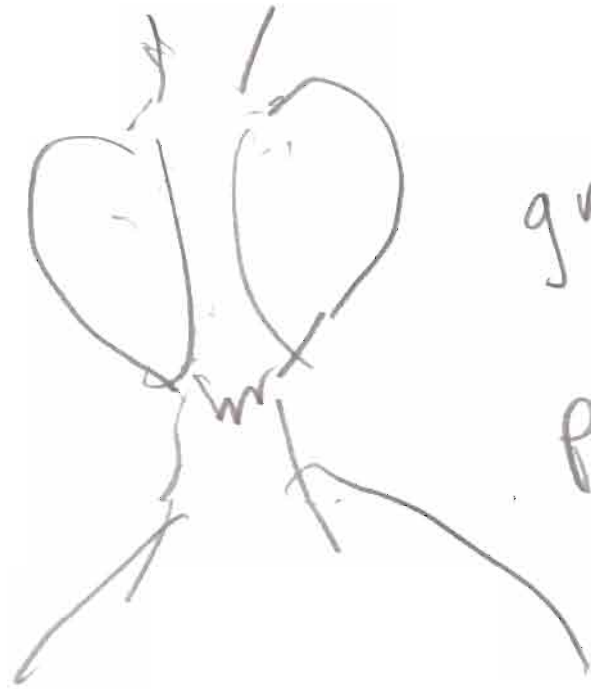

But this is more high tech.
CAN use energy to MELT ROCK
instead of Blasting it.

workers feel LIKE drones.
But the scale feels LIKE
Huge underground tunnel complexes,
MAKING something on A MASSIVE scale
with technology different than our current
technology.

IT INVOLVES Brute force alteration of
SUBTERRANEAN LOCATION, BUT done with
a technology that seems to MELT
STONE.

Fetuses
grown IN
BIG TANKS
IN A murky
FILMY
solution

grown
By
preying
MANTIS
BEINGS
