Target 0206-0001

Remote Viewer:	Daz Smith
Method:	CRV
Protocol:	BLIND – I had no information on this target other than the number
Date:	02 June 2010

The target is:

Motion

Energy

land

The Land is:

Hard, brown and rising.

The land feel wide and spacious.

natural

green and browns

(I may have been looking at a vista of land form up high)

There feels like an interaction between the land and the motion is some way.

The motion is:

Wild and explosive

feels packed full of energy.

explosive with energy.

Its fast moving

vibrational and warm.

there is an intense sound wave with this.

The energy:

Feels like a release

expelled

outwards in a broad 360 motion.

With a great force and a loud 'whoosh' sound.

Move in a wave – like a shockwave.

Enveloping everything outwards from it.

Other data of note:

The target felt choking and thick in smell and metallic in taste.

I sensed what felt like an object involved in this – but I am not sure – and not sure if this is the focus of the target at all?
