

RV “Multiple Universes Project” Viewer Cover Page

Directions: Please include this sheet as the first page of your session. After all remote viewing is completed for this project, you will be sent the target definition for this remote-viewing session via email. A time window will be established to allow you to compare your remote-viewing data for this session with the target before the passwords to decrypt your session data will be made available to the general public. Comparing each page of your remote-viewing data to the target is called “closing the session,” and it is important that you utilize the allocated time window to do this. This is a “public” remote-viewing study. By participating in this study, you are agreeing to place this session in the public domain, thereby allowing the public to download, save, and eventually examine your remote-viewing session. You are also allowing research to be conducted and published using your remote-viewing data. Thanks for participating in this important study.
