## Focus on the significant structure @ the target 5

large, permanent, lots of wood, warm / amber / tawny colors, lighting is high up and soft, nothing harsh about the lighting or the structure, roomy, large, red color on the floor, mostly men are here, adults, talking, sound is muted, respectful place, structure is large and tall & not ostentatious but beautiful, sturdy, old, in good shape, dignified, elegant, structure keeps its secrets, active here, lots of people come and go, W-pale, dynamic, sturdy, people can count on this structure, venerable, PR-reminds me of the personality of an old Southern gentleman, more than one entrance, structure is significant / interesting in that there's an open-door-type policy = people come and go all the time & that's okay  
 Structure is in an urban area surrounded by many other structures

## Shift to 1000' above structure & describe

mostly flat, some hills, greenery, urban setting, lots of structures, few / if any skyscrapers, moist air, sunny most buildings are white or pale in color, feels American streets are wide and laid out in an orderly fashion

## Focus on the activity @ the structure @ time of event.

Talking, murmuring, no shouting, people are standing close to one another, dressed up people, mostly men wearing blue / black, humming sound, down to business, not just casual chatting, somewhat serious, more formal than casual, mostly standing, some people are "posturing" = hands in pockets, lots of flattery

Focus on the significant subject @ the event.

6

subject is standing somewhere slightly elevated from others, people are all around subject, feels masculine, subject is joking / talking / smiling / laughing / "working the crowd," standing, entertaining people, well spoken, people are listening, speaks rapidly  
 (central subject) (physical characteristics) (mind <sup>emotional</sup> probe)

man, slim, healthy, moderate height, great posture, short hair, tan, smiles a lot, lithe, active, articulate, speaks well and easily, PR = like a paid public speaker, uses laughter a lot, middle-aged, confident, mind works a mile-a-minute, easy-going, calm, enjoying himself, disciplined, PR/D = reminds me of how I think Tiger Woods is, forceful, articulate, expressive face

Shift to small subject is Scan #2 & describe

dense, compact, small, on the ground, doesn't feel human, moves quickly, darts around, simple-minded, animated, may even be an electric device

Focus on the significance of the event @ the target.

evening, finite time, meeting-like, scheduled, not spontaneous, lots of people around talking and putting on a good show, subdued bragging / posturing, PR = reminds me of a company Christmas party = everyone trying to be on good behavior, successful, people meeting people, message is understood, productive for the people involved.

Focus on what the tasker needs to know re: objective 7

staged, planned, successful, kind of phony since every detail was planned, go overtime, take longer than expected, mostly men, a few women, formal business-type atmosphere, PR = reminds me of a post-Symphony party of some sort, W = challenging, bright lights on main person and subdued lighting elsewhere

End session - 8<sup>40</sup> pm PST

### Summary:

This is a group of adults - mostly men - meeting in a large, beautiful building. The lighting is artificial inside - warm colors - and it seems to be brighter outdoors. This is a place where people don't speak too loudly - like a library. It's as if this was a scheduled meeting that was productive even though it was largely "scripted." Information was shared and well-received.
