S3

S6 DIARIZATION

Completely distracted by pets, companion, phone.
Unable to focus properly - Felt rushed -

Sense of object spinning or rotating.

Metallie aspects to this target. Purple and
structure obtrusive on awareness. Atmosphere
near target is cool with pockets of warmth.

There are jagged peaks or edges, looks
mountainous, but feels more like jagged shards.

There are people near target - some gathered
in a group. The skies appear tumultuous in
areas.
