Resume 10.36

Summary

The target contains a man made
which is very large
is able to be moved
with assistance

when functioning it is:

- hot
- smells acrid
- shakes
- vibrates
- loud
- dangerous

a portion of its surface is black in
tile-like or brick-like pattern

other surface parts are (areas)

- white
- slick
- plastic-y
- or painted
- with epoxy-type paint

light-weight

smooth

One interior location is
has an aerodynamic feel

dark

warm

enclosed

14/19

Small

crowded - feeling
quieter than other areas

the interior surface of this enclosure
is flat

black

feels like a chalkboard

another area of the manmade - a central area - is

white

slick

shiny

metallic

hollow

contains fire

or some kind of fuel-burning system

which is very powerful

very sophisticated

very complicated but

elegantly simple

another area of the surface of the manmade is

white

slick

plastic-y

light weight

with a curved shape

like a fin

15/19

which purpose is to
shape the wind

has a mechanical component
to change the shape
which is computer controlled

another interior area

has a control purpose
programming purpose
contains biologicals
who are crowded

dizzy
hard working
looking forward to finishing
the work and getting
out.

who are doing set-up
programming
final check out

another interior area is

large
spacious
empty-feeling
quiet
purpose is storage

16/19

contains create-like objects
is well-organized
is "ready"

the target contains biologicals
that are human

mostly male

generally athletic

tiny compared to the manmade
wearing white outer garments
like coats

that mostly match

wearing blue uniforms

that match

as a group they are military-ish

scientific

purposeful

not afraid of the manmade

focused on using the manmade

many are

standing on a hard surface

that is hard

with markings

17/19

the target contains a location
that is far away from the manmade

tan color

sandy mountains

Sand dunes

desert-y

that is the focus of the biologicals and
the manmade

for a purpose that is

a mystery

science

adventure

which is a hardship

very expensive

which contains structures

that are hard to see

same color as the land

really large

mostly underground

'catacomb' feel

whose purpose is

18/19

waiting
scientific
psi-science with elements of
yoga
meditation
mind control or
psi-exercise

has a significant public relations
or group control component
but this is not primary focus

Other things I found at the target are

an energy
that is hot
windy
whooshing noise
near outer space
causes the biologicals a sense of
deep satisfaction
accomplishment

a manmade that is
white
fans
indoors
brightly lit

19/19

purpose is for resting
waiting
rejuvenating

where there is a noise like a fountain

a manmade

with an 'office' feel

that is busy
safe

administrative

purposeful

controlling

calm

Finish
